Promoting Healthy Lifestyle at £0 Cost to Your Business.

With the growing demand for more modern and healthy lifestyle choices in the UK each year, people are looking for ways to keep their healthy habits part of their everyday lives. Supermarket chains in the UK are already stocking more healthy and conscious options to keep up with consumers' needs, so why not offer delicious and healthy snack and drinks options at your venue too?

I am looking for healthier snacking options to fit my lifestyle and keep me energised during the day.

How it Works.

Our machines come fully serviced and thoroughly maintained by us. We take care of everything: stocking up and replenishing the machines when necessary. All we need from you is a square meter of floor space and an electrical socket.

Most importantly, Our machine and services are completely free of charge for the hosting venue!

Why Choose The Jar - Healthy Vending?

We carefully select our suppliers by focusing on natural ingredients, sustainability of production process and packaging, and the values that the suppliers follow.

But most importantly - we only source tasty and delicious products, whether it would be a peanut bar, cold pressed juice from wonky and ugly fruit, or a sustainable and 100% natural cola drink.

What's in it for you?

Less Energy Consumption

No Overstock

Huge Variety of Products

Compact

Safe and Secured 24/7

The Best Vending Experiences

Connected Vending

We incorporated telemetry software in our machines that allows us to monitor the status of the vending unit and its vital components as well as collecting sales statistics.

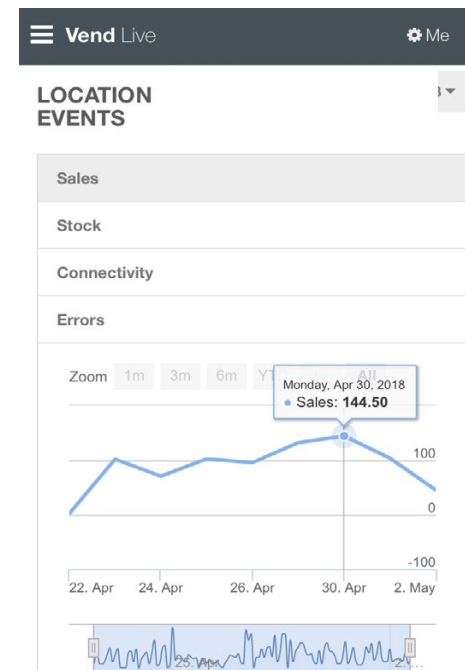

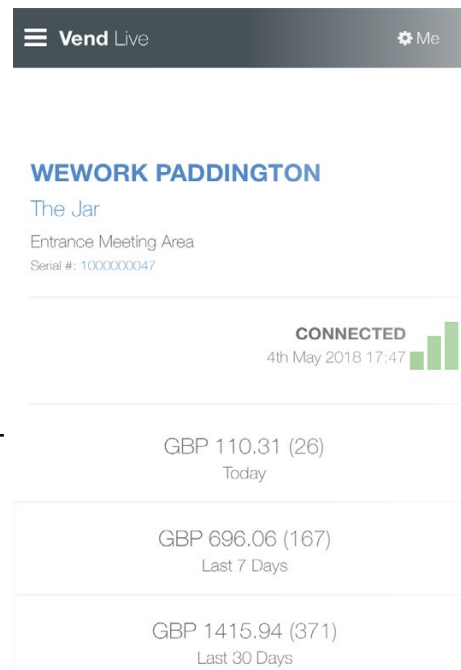

Customised Vending

We only aim to sell what suites our customers' taste. Clients can customise their own menu from our abundant list of over 100 snacks and drinks. We can also source specific product as requested by the client. Questionnaires will be collected to further improve our product selection.

Conscious Vending

We donate a portion of our profits to support school Breakfast Clubs - ensuring that kids are fuelled-up to learn and thrive. On top of that, at the end of the product shelf life, unsold food from The Jar machines is donated to charities.
